.Enhancement of ion transport through ceramic membranes by electric fields. We report the results of electric field studies of ion transport through ceramic membranes. We find that ionic conductivities are enhanced by an applied electric field over a range of electric field strengths and membrane thicknesses. The enhancement is observed for low-ionic-strength NaCl solutions as well as for higher ionic-strength solutions containing electrolyte additives. The results are interpreted within the framework of a recently proposed transport model for charged membrane systems. The model incorporates the effects of field-induced dipole moments in the membrane material. We find that the potential of the electric field is reduced by the polarization of the membrane, which reduces the effective mobility of the membrane ions.

'It's really scary': Melissa McEwan, a Colorado blogger and the wife of Colorado Senator Michael Bennet, says that she is worried for her husband's safety. Her car was on fire, flames shooting up toward her husband Michael Bennet's, in what she believes was a politically motivated attack. 'I was in bed in Denver, about three miles away from my house, in the middle of the night, and I heard a loud boom,' said Melissa McEwan, an Independence Party blogger and the wife of Senator Bennet. 'I saw a fire next to my driveway. I had to get out of the house quickly. The fire was spreading to the car. I looked at my husband's house, the car was on fire, it was really scary. My husband's next-door neighbor came out and told me that the car was on fire.' Fortunately, the Senator was in Washington at the time and not home. Fire officials said the car, which was near Bennet's home, was set on fire between 1.15 and 1.30am in the area of Longs Peak. As a precaution, police said they patrolled the area, and nothing suspicious was found. But the incident is sure to add to the already tense state of race relations in Colorado, where a race-based controversy over gun control has led to a number of high-profile attacks against Republican politicians. 'I felt my husband's house was potentially in danger,' McEwan said. 'I feel very strongly about gun control. I'm not a fan of assault weapons, but I don't believe he has any.'

She added: 'My husband has been 2d92ce491b
