E-mail: rootzheng@gmail.com. Free shipping. I provide you with

Download: or nck dongle android mtk 12 Thanks for helping to improve the site by adding useful info or correcting grammatical errors. CommentsQ: Flex 4 - The display list property can only be used with a display object tag I'm following a tutorial on an API and trying to setup the ActionScript for some of the code but keep running into a problem that I'm sure is simple. I did find an article on a similar topic but it didn't quite answer my question. Here is the error message that keeps getting displayed after I try to compile my swf The display list property can only be used with a display object tag compiler.loader.default.as:234 Error: The display list property can only be used with a display object tag I have a pure ActionScript file and then it calls a MXML file but I'm not 100% sure if that is what is causing the error. I'm new to Flex and the code has been provided by a tutorial I've been following. public class TrainingController extends SkinnableComponent implements IPropertyHandler { public var lastName:String; public var currentName:String; public function TrainingController(lastName:String, currentName:String, type:String) { lastName = lastName; currentName = currentName; var page:MovieClip = new TrainingPage(); addChild(page); } public function enterTrainingPage():void { currentName.text = lastName; lastName = currentName.text; LoaderManager.addBitmapCacheDirectory(Application.applicationPath + "/featuretraining/images/"); } public function exitTrainingPage():void { currentName.text = lastName; lastName = currentName.text; LoaderManager.removeBitmapCacheDirectory(Application.applicationPath + "/featuretraining/images/"); }ef4e8ef8d
