Handy Shortcuts is a freeware app that creates shortcuts on your desktop for Windows utilities which aren't normally available as easy to use desktop shortcuts. If you're trying to create a desktop icon to quickly access important Windows tools and can't find a way to do that, Handy Shortcuts is one of the most effective apps to address this issue. Specifically designed to create desktop shortcuts for many Windows utilities, Handy Shortcuts relies on what can be very well considered a fairly basic interface that provides instant access to its features and nothing more. In just a few words, Handy Shortcuts presents all options in a tabbed window and it's usually enough to press the "Create" button to quickly create a desktop shortcut for the selected Windows tool. The "Basic" tab for instance gives you the power to build a desktop shortcut to lock the system, switch user accounts, shut down, restart, log off or hibernate Windows, show desktop, add or remove programs, open Device Manager or launch Windows Security Center. More experienced users may be happy to find out that more options are hiding under the "Advanced" tab, allowing them to create shortcuts for launching Windows Defender, activating Flip3D, disabling or enabling Windows Firewall or even Safely Remove Hardware. There are no options to play with, which is quite good news because you don't really need such a feature since it all comes down to some desktop shortcuts, but a help section could come in handy to many users out there. Overall, Handy Shortcuts does what it says with absolutely no options. Just a crystal clear and well thought out interface that provides one-click access to the shortcuts you need. System Requirements: Microsoft Windows XP, Vista, 7, 8, 10 (32-bit or 64-bit) Handy Shortcuts Version: 1.5 Download Handy Shortcuts for Windows 27) Windows Backup for Portable Devices This small but powerful application takes away the hassle of backups. It provides enhanced features and an innovative integration with the Windows System and Remote Backup technologies. It provides you a safe and easy way to back up your photos, music, videos and documents. Windows Backup is scheduled to do local backup or remote backup with an agent on your PC or device, or by sending copy of a backup to a remote server or device. It integrates into Explorer and Task Manager for easy backup management. The hard
