Now you have a custom wallpaper for your screen. You can easily install, uninstall and change the wallpapers, every time you like. The Wallpaper Manager application is a simple tool, but powerful enough to let you manage all your screen backgrounds and keep them automatically updated. What's new in this release: To install this application in your machine, you need to put it in your Ubuntu Software Center. In order to install this application from Ubuntu Software Center, click on the "Install" button from the menu and then press the "Close" button to close the License Agreement window. This application is provided by Compiz([www.compiz.org](http://www.compiz.org)). Ubuntu 12.04 Theme is developed by people from Compiz team. Compiz is a free open source window manager and compositing window manager designed to replace the aging X11 window manager, and Gnome-panel. The open source 3D desktop effects and window manager complementing software is designed to make your computer attractive and easier to use. This project enables users to gain access to advanced desktop effects, such as shadows, transparency and 3D movement of windows and icons. Furthermore, Compiz can make use of the Linux kernel's compositing window manager acceleration via the OpenGL hardware accelerator. If the system's hardware supports 3D rendering with OpenGL, Compiz can be accelerated up to 4x performance and enable 3D effects such as animation, window morphing, and more. Compiz 1.2.3 WARNING: This stable version of Compiz comes with some incompatibilities with other CCSM plugins. Please deactivate: All Windows Decoration plugins in CCSM and change/remove "Enable" menu items in the upper side. ### What's New In?

Take advantage of a suite of Ubuntu images, wallpapers, and icons now. Ubuntu 12.04 Themes is a series of images that can be added to the desktop as the screensaver or as the background. The screen savers have a simple interface with a slide show of images and the ability to add and remove images. The fifteen available images are high resolution 1920x1080 images that will fit on any screen, since they are divided into five sections, each of which can be themed to a different look and feel. So you can have five different screensavers (canvas, cartoon, animals, wallpaper, abstract) on the desktop. There are also fifteen different wallpapers that can be placed on the desktop in five different positions. The wallpapers are all 1920x1080 and they also have an easy interface. A user can also choose a different color scheme and icons. The colors may be adjusted for the windows and the desktop. The icons can be replaced with different icons for applications, places and even user folders.
