F.3d 1210, 1214 (9th Cir. 2001) (“Claims against a government agent are likewise exempt from the FTCA’s exhaustion 4 requirement.”). Thus, the exhaustion requirement of § 2675(a) does not apply because this action is against the United States and not against a federal employee. IV We hold that the magistrate judge lacked jurisdiction to hear the case and reverse. REVERSED. 5 Q: unable to connect MySql using pure java I am creating an android app where data is entered by the user. The data will be taken from the database to display on the UI. I am new to this so I know I am doing something wrong. I have created the database in MySQL using MySQL Workbench. Here is my code where db is the database name and user is the username and password is the password. I have successfully connected to the database using SQL Workbench but not through the java code. I am getting no connection but when I connect using SQL Workbench it works

Torrent Leech Mode Torrent Leech Mode is the Leech's mode of operation. Essentially, a leech should have an idea of what torrent files he/she needs to be downloading. After downloading, the leech should then retrieve the torrent via BitTorrent and open the content. After the download, the leech should move the files to an appropriate place. For instance, a leech can copy the content to a local folder. On the other hand, the leech can move the content to a cloud storage space such as Dropbox or Google Drive. The purpose of Leech mode is to increase the speed of the overall download process. But I will not be elaborating on torrent leech mode in this manual. . Call is dropped Call is dropped means the voice and the data are disconnected from each other. There are several reasons why call is dropped. One of which is incorrect PTT (push-to-talk) key configuration. Check your configuration, and contact the service provider for the exact reason of the call being dropped. . Cisco Router is not responding If your Cisco Router is not responding to your commands, double check to make sure that your access password is correct and that you have entered it correctly. You may also make sure that your router is connected to the internet. . TCP RST (reset) TCP RST is an exception that involves TCP. This packet is used in event of router failure. . VPN VPN stands for Virtual Private Network. This is a computer network that can be protected like a private network. This can be a work area that can be shared with other users and a secure network that should be used by only the authorized users. . Routing Routing is something that ensures a path for data transmission. In other words, you have to ensure that data reaches the intended receiver. If a router cannot find a route to the destination, then the router will try to get a route to the destination through other routers. . Home Router Security Home router security can be seen as a means of protecting your home network from the outside world. There are several home router security features that you need to know. Most of which are outlined in this manual. For instance, you will learn how to enable firewall, antivirus, parental control and spam detection.
